## DETAILED ACTION

1. Applicant's election without traverse of Group II (claims 57-66) in the reply filed on 1/7/08 is acknowledged.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 57-66 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification does not provide support for "carrying out the color display by making a first variance ratio differ from a second variance ratio, the first variance being obtained at a gray level in a first primary color among the plurality of primary colors when the total number of sustain pulses is changed from the first pulse number to the second pulse number, and the second variance being obtained at a gray level in a second primary color different from the first primary color when the total number of sustain pulses is changed form the first pulse number to the second pulse number" as is now claimed in independent claims 57 and 64.

Applicant's remarks state that the support for claims 57 and 64 can be found in the specification at page 22, line 10 to page 25, line 4 and Fig. 8. However, the cited sections in the specification do not provide any support for the limitation as claimed.
